# ADITYA Raj

9798927844 adityarajmanav@gmail.com Aditya raj Aditya Leetcode Portfolio

## Education

**Dsce Bangalore** **September 2023 - March 2027**

*B.Tech, Electronics and communication Engineering* *Bangalore, India*

- Technical Courses: Data Structures and Algorithms, Analysis and Design of Algorithms , Object Oriented Programming, Operating Systems, web development , sql

## Technical Skills

**Languages:** C++, C# , Java 8+ (Streams, Lambdas, Functional Interfaces), JavaScript, TypeScript,

**Frameworks & Databases:** ASP.NET, AngularJS, Azure, Spring Boot (Basics), Firebase, NodeJs

**Scalability & Performance:** Pagination, Query Optimization, API Optimization

**Concepts:** OOPs, Data Structures & Algorithms,Authentication & Authorization(JWT, OAuth)

**AI:** Prompt Engineering(Basics), AI Tool usage(chat gpt , Api models) , Embedding Models

**Testing & Quality:** Postman Testing, Debugging, Code Reviews

## Experience & work

- **Virtual Experience-**Tata group(Data analytics simulation), Deloitte(Technology simulation)
- **Project Experience**- Skillpath AI(AI powered placement platform), Smart task manager (full stack-application using mern-stack)
- **Position of Responsibility-**Disciplinary committee member (Event coordination and management)

## Projects

**Skillpath-Ai** | *MERN Stack, Gemini AI, OpenRouter API, Render, Vercel* | **Github** **April 2026**

- Developed and deployed an AI-powered full-stack placement preparation platform using the MERN stack, featuring personalized roadmap generation, resume analysis, and AI-based mock interviews.
- Integrated advanced AI capabilities using Google Gemini API and OpenRouter, along with secure authentication (JWT, bcrypt) and dynamic features like progress tracking, job insights, and PDF export.
- Successfully deployed the application on Render and Vercel, ensuring scalability, responsive design, and seamless real-world user experience.

**Smart-task-manager** | *MERN Stack, JWT, MongoDB, Render* | **Github** **Feb 2026**

- Developed a full-stack task management application using the MERN stack and implemented JWT-based authentication to ensure secure user registration, login, and protected routes.
- Implemented advanced task features including CRUD operations, task categorization, priority levels, deadlines, subtasks, notes, and real-time updates to enhance productivity and task organization.
- Designed a responsive user interface with productivity tracking features such as efficiency metrics, streak monitoring, and smart filtering/search, and deployed the application on Render for seamless accessibility.

**Leafwise-ai** |*React, TypeScript, Swin Transformer, EfficientNetV2*| **Github** **jan 2026**

- Developed a deep learning–based web application for plant disease detection using React and TypeScript, enabling users to upload leaf images and receive instant predictions across multiple plant species.
- Implemented a hybrid model combining Swin Transformer and EfficientNetV2 trained on the PlantVillage dataset to improve classification accuracy, and designed a fast, user-friendly interface for real-time processing and seamless experience.

## Achievements

- Solved more than 200+ problems across platforms leetcode,codeforces,GFG, interviewbit,codechef.
- Achieved a 50-day coding streak badge on LeetCode.
- Built a disaster management solution at Aventus 3.0 (May 2025), optimizing emergency routes for faster relief delivery.
- Earned certifications from Oracle, Deloitte, Tata, and Infosys (Angular Web Developer), gaining experience in Generative AI, data analytics, and full-stack development.

## Extra Curricular/Activities

Head of Content & Social Media, Photography Club – managed event coverage and improved digital engagement.

Maintained discipline and managed crowds as a Disciplinary Committee member, ensuring smooth execution of college events.
